

**Would you let your kids play
in a puddle of chemicals?**

***Oil drippings & leaky fluids
get washed “away” into the
city’s streets and retention
basins.***

Keep it clean by placing drip pans under leaky vehicles and properly disposing of waste oil, coolant and other automotive fluids. Never wash spills into the street. You’ll not only keep pollutants out of our retention basins, but also our water table.

STORM

Only rain in the stormdrain
