

STORM

STormwater Outreach for
Regional Municipalities

Only Rain in the Storm Drain

How to Conduct an Inspection

Inspection Preparation

- Safety equipment
- Inspection form
- Camera

What Else To Bring

- **Clip Board**
- **Gloves**
- **Sample Jar**
- **Heavy duty marker**
- **SWPPP Map**
- **Phone**

Be aware of your environment!

Confined Spaces

- Limited entry/exit
- Large enough to enter
- Has potential to be hazardous
- Not intended for continuous occupancy

This is NOT confined space training!

Possible Confined Spaces

Facility Walkthrough

Walk through the industrial process in order:

Raw materials

Manufacturing

Finished Product

Waste

Facility Walkthrough

Include exposed areas with:

- Processing/manufacturing
- Material/waste storage
- Loading/unloading
- Vehicle/equipment storage
- Vehicle/equipment maintenance

Follow the Water

Understand:

- On-site stormwater flow pattern
- Sources of run-on & run-off
- Stormwater discharge points
- Pollutants exposed to stormwater

Potential Problems

- **Pollutants exposed to stormwater**
- **Pollutant sources near storm sewer inlets**
- **Erosion/sedimentation areas**
- **Missing or malfunctioning CMs**

Anything other than stormwater entering MS4!

Modern Art...

... or stormwater compliance issue?

Documenting a SWPPP or Permit Inconsistency

Record on inspection form:

- **Location**
- **Type (missing CM, failed CM, CM needs maintenance...)**
- **Photographs**

Questions

**For more information on the materials
